July 1997

19 August 1997

August 1997

18 September 1997

September 1997

20 October 1997

ABOUT THIS PUBLICATION The aim of this publication is to provide users with a range of the latest statistics available at the end of each month of issue. Consequently, the dates and periods shown are not always the same for each table, but are in each case the latest figures available at that time.

SEASONAL ADJUSTMENT

Seasonal adjustment is a means of removing the estimated effects of normal seasonal variations from economic time series so that the effects of other influences are obvious. Seasonal variations are the systematic (though not necessarily regular) intra-year movements of economic time series. These are often the result of non-economic phenomena, such as climatic changes and regular religious festivals e.g. Christmas and Easter.

TREND ESTIMATE

Smoothing seasonally adjusted series produces a measure of trend by removing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson weighted moving average to the respective seasonally adjusted series. Readers are reminded that trend estimates are subject to revision as subsequent months' data become available.

SYMBOLS AND OTHER

USAGES

not available n.a.

not elsewhere classified n.e.c.

not available for publication but included in totals where applicable n.p.

n.y.a. not yet available

preliminary - figure or series subject to revision

figure or series revised since previous issue

not applicable

nil or rounded to zero

INQUIRIES

For information about other ABS statistics and services, please refer to the back of this publication.

For further information about these statistics, contact Information Services on Melbourne 03 9615 7000.

Stuart Jackson

Regional Director, Victoria

### PRIVATE NEW CAPITAL EXPENDITURE

The value of private new capital expenditure, in seasonally adjusted terms, for Victoria in the March quarter 1997 was \$2,895.3 million, which continued the quarterly variability.

For Australia, the value of private new capital expenditure, in seasonally adjusted terms, in the March quarter 1997 was \$10,860.4 million, which increased from the previous quarter after a 2-quarter decrease.

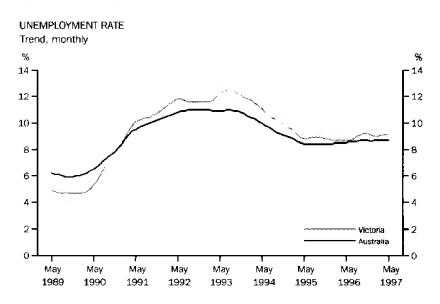

Private new capital expenditure for Victoria accounted for 26.7% of the Australian total.

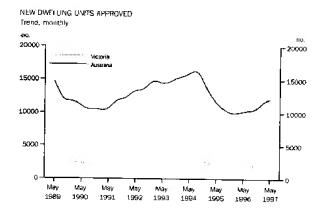

### UNEMPLOYMENT RATE

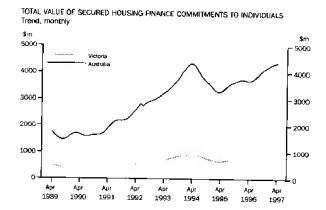

The trend estimate of the unemployment rate for Victoria in May 1997 was 9.2%, up 1 decimal point from the previous month.

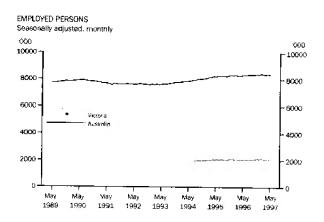

For Australia, the trend estimate of the unemployment rate in May 1997 was 8.7%, remaining unchanged over the past five months.
